# AFFORDABLE VOICE SOLUTION

## TIME Voice Over Broadband Business

TIME Voice Over Broadband Business is a revolutionary telephony service that allows you to communicate over an existing broadband line.

TIME VoBB Business uses TIME's Voice over IP network to deliver up to one hundred concurrent phone calls over a single broadband connection. It uses the Internet to route calls to any telephone, anywhere in the world - at a fraction of the cost of a traditional phone call. You can reduce your communication costs and unify your organisation, with employees in multiple locations connected via the same high-performance telephony platform.

Revolutionise the way you communicate.

Voice Mobility  
Product

Voice and Multimedia  
over IP Networks

Accessible with  
any Broadband

Supports Access on

#### Quick Deployment

- Simple network architecture for quick deployment

# COMPREHENSIVE WITH LOWER RATES

## Feature-rich, flexible and cost effective

Requiring a minimum bandwidth of only 100Kbps, it works on virtually any broadband connection. Increase your global business presence by opening an instant 'virtual office' almost anywhere.

Add lines when required as our packages are scalable to meet the needs of growing businesses. Our solution is future proof and provides a default interface for next generation PBX and phone. Despite all the many features packed with this service, we offer the smallest charging block in the market.

TIME VoBB Business offers you the most competitive rates of voice solution for your everyday's business needs.

# FLEXIBLE CONFIGURATION OPTIONS

Depending on the needs of an organisation, opt between VoBB Client for a basic one line per user setup or VoBB Trunk to manage multiple lines through IP-PBX. With many available SIP softphones offered as freeware, your setup cost can be close to zero.

## VoBB Client

One Line • One Phone

- For small-scale companies with low concurrent call usage
- Basic of 1 line and upgrade options (in multiples of 1 line)
- 1 line is assigned with 1 DID

## VoBB Trunk

One Trunk • Multiple Lines • Many Phones

- For large-scale companies with high call usage
- Basic of minimum 100 lines and upgrade options (in multiple of 10 lines)
- 100 lines are assigned with 100 DIDs

# SIMPLY FOCUSED ON COST SAVING
